

WE ARE EMBARKING ON A HISTORIC CAMPAIGN TO CREATE A SECOND CAMPUS.

The East Coast Zoological Foundation, known for our flagship campus, Brevard Zoo, is launching the most significant campaign in our history. We will raise \$100 million to build a world-class aquarium and conservation campus and expand our mission work in animal wellness, conservation, sustainability and education.

The aquarium and conservation campus will serve as a regional conservation hub with an emphasis on restoring the Indian River Lagoon and our coastal ecosystem. It will educate and empower over half a million people a year on how to become environmental stewards. It will also generate significant funding for habitat restoration, species recovery and scientific research throughout the Lagoon.

This campaign is a once-in-a-lifetime opportunity to make a lasting impact on the families, ecosystems and wildlife who call Florida home.
